

Business focus

The company has been manufacturing and supplying servo drives, control systems for machines and equipment in industrial automation for more than 25 years.

For the effective provision of these products and services, the company has a management system in place, according to the Quality Management Systems ČSN EN ISO 9001:2016 standard and the Environmental Management System ČSN EN ISO 14001:2016 standard. The management system is applied for the activity:

- Design, development, production, and service of TGZ servo amplifiers, TGS feeders and TGM control units,
- Development and creation of application software,
- Sales and service of servo motors, gearboxes, servo amplifiers, chokes and anti-interference filters.

Management commitment

The management of the company undertakes to apply this policy and its principles, provide adequate resources, and create the necessary organizational conditions for improving efficiency and continuous improvement of the management system. The policy is based on the following principles:

- Satisfy customer needs to the maximum extent.
- To perform its activities and services in accordance with legal and other requirements.
- Ensure a safe and health-free working environment, eliminate hazards, reduce occupational health and safety risks, and prevent occupational accidents.
- To constantly improve in the area of environmental protection, to create such conditions that ensure the prevention of pollution.
- Establish company goals, improve the quality of provided products and services.
- Manage risks and opportunities that may affect product and service quality and customer satisfaction.
- Control the activities of suppliers and emphasize compliance with regulations and contractual obligations.
- Ensure the required competence of employees and increase their qualification.
- Maintain employee awareness of customer requirements and integrated management system requirements.

The policy is binding for all employees. The company management undertakes to acquaint them with the principles of the policy and the requirements of the management system.
